MAINTENANCE TRAINING – DA42tdi Twin Star Airframe and Avionics.

- Feb 26-29,2008 Apr 22-25,2008 Jun 17-20,2008
 Oct 21-24,2008 Dec 2-5,2008

Thielert Centurion 1.7 Engine Course is a prerequisite for this course.

This four-day course includes classroom instruction covering airframe systems and propeller and engine to airframe interface on the DA42tdi diesel powered Twin Star aircraft. In addition, it includes a one day Garmin G1000 Line Maintenance Course. Classroom sessions are held at the Diamond Flight Center. A tour of our factory will be included. Engine maintenance training is offered separately by Thielert Aircraft Engines in Dallas, Texas. For details on their Service Center training dates and course registration form, see their website at: <http://www.centurion-engines.com>.

Please reserve space for the following individuals in the above course.

Course Participants Name	Position or Title

NOTE: Above course is offered at our training facilities in London, Ontario Canada, free of charge to Diamond Authorized Service Centers. For others, a tuition fee of \$800.00 US will be applied. Participants will be responsible for their own transportation, accommodations and meals. Diamond Aircraft provides all course materials and lunch on the days of the course free of charge.

Please indicate method of payment for course reservation (if applicable).
